| SUMMARY       | Lead C# .NET developer with expertise in building applications and ERP integrations, delivering solutions with minimal supervision. Former semiconductor process engineer with strong systems analysis skills, now focused on software development in remote or hybrid roles in Atlanta, GA.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| SKILLS        | C#, SQL, AI-Assisted Development, PowerShell, Azure DevOps, YML, Python, Java, APIs, EDI/cXML                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| CERTIFICATION | Google Cloud Certified Associate Cloud Engineer, October 2024 – October 2027                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| EXPERIENCE    | <p><b>Motion Industries, Birmingham, AL, February 2022 – Present</b></p> <p><b>Prophet 21 Team</b></p> <p>Software Engineer I : December 2023, Software Engineer II : December 2024</p> <ul style="list-style-type: none"><li>Engineered from-scratch EDI integration with Prophet 21 ERP using PowerShell file transfer scripts and ETL .NET console application.</li><li>Designed and built custom PeopleSoft integration using Prophet 21 APIs and C# application to automate and migrate AR/AP financial processes to external systems.</li><li>Used AI development tools leveraging Claude and ChatGPT models to validate code, generate unit tests, streamline CI/CD pipeline creation, and accelerate troubleshooting of integrations and enhancements.</li><li>Developed reusable .NET Framework library accelerating Prophet 21 C# business rule development.</li><li>Implemented and unit tested numerous backend and full-stack ERP enhancements in C#, achieving 80%+ coverage in compliance with organizational policy.</li><li>Authored Azure DevOps pipelines to automate unit tests, enforce coverage requirements with SonarQube, and deploy ERP integrations and enhancements.</li><li>Developed an event-based ERP C# enhancement that posts events to Google Cloud and monitored GCP Pub/Sub logs and buckets to ensure successful application performance.</li><li>Acted as primary technical contact for cross-team Prophet 21 integrations, advising on APIs and ERP architecture.</li><li>Documented solutions in Confluence and trained peers on ERP usage and software development.</li><li>Coordinated with consultants to expand organizational ERP knowledge and lead solutioning sessions.</li><li>Designed and implemented SQL Server tables, procedures, and views to support ERP integrations.</li></ul> <p><b>eBusiness Team</b></p> <p>Software Developer Trainee : February 2022, Associate Software Developer : February 2023</p> <ul style="list-style-type: none"><li>Partnered with analysts to gather requirements and deliver Java code updates enabling EDI processing.</li><li>Resolved production issues same-day to maintain uninterrupted order processing.</li><li>Automated recurring reporting for stakeholders using Python, Java, and SQL.</li><li>Refactored backend Java application to decouple modules and simplify unit testing.</li><li>Contributed in agile scrum team to prioritize features and advance CI/CD adoption.</li><li>Led team as technical owner of OCR application automating invoice and order PDF ingestion.</li><li>Mentored software intern, improving test coverage and addressing technical debt.</li><li>Delivered OCR proof-of-concept reducing onboarding overhead for new customers.</li><li>Converted legacy Visual Basic code to C# to remediate security vulnerabilities.</li></ul> <p><b>CreeLED Inc., Durham, NC, July 2017 – January 2022</b></p> <p>R&amp;D Semiconductor Process Engineer I / II</p> <ul style="list-style-type: none"><li>Researched, improved, and automated semiconductor production processes.</li></ul> <p><b>EDUCATION</b></p> <p><b>Computer Programming Certificate, August 2021</b></p> <p>North Carolina State University, Raleigh, NC</p> <p><b>Bachelor of Science in Chemical Engineering, May 2017</b></p> <p>The University of Alabama, Tuscaloosa, AL</p> |
